CAREER SUMMARY

I am a Software Developer able to build an App from concept, navigation and layout. I have working experience with Javascript technologies such as React and Node. I also experience with .NET, C#, SQL Server, MySQL and Firebase. Fast learner, hard worker and team player who is proficient in an array of tools.

WORK EXPERIENCE

○ Innovation and Development Engineer Jr. VisaNet Dominicana

Apr 2022 - Present

- Development of a reporting application for external use using React and Node.
- Provide support to clients to implement payment gateway with Cybersource.
- Design and development of internal applications using .NET, ASP.NET and MVC.

Technologies used:

React

Node

Javascript

CSS / Bootstrap

.NET

C#

SQL Server

Cybersource

○ Process Documentation Specialist Grupo Ramos

Nov 2018 - Apr 2022

Plan the activities of creation, approval and distribution of the standard documentation of the Company Processes according to the international standards and good practices of quality management, in order to promote the standardization and continuous improvement of the company's processes.

Key functions:

- Design the distribution strategy for the documentation created and the removal of obsolete documentation in order to ensure the quality of the published documentation.
- Establish the documentation guidelines required for each Business Process in order to guarantee the standardization of their scheme.
- Coordinate the process documentation activities of the company in order to ensure compliance with the regulations (ISO 9000).

○ Purchase Order Coordinator Grupo Ramos

Jun 2016 - Oct 2018

Coordinate the purchase of products of local origin and / or import, in order to comply with the purchase plans of the company, satisfy demand, and avoid inventory shortages.

Key functions:

- Execute and control the product purchase plan.
- Follow the fulfillment of orders by our local and import suppliers.
- Ensure generation of orders with correct specifications (quantity, delivery time, discounts, etc.).
